APPROVAL PROCESS HANDBOOK (sample text, written for the demo)

3.4 Faculty. An institution shall maintain, at all times, at least one full-time teacher for every fifteen students
admitted in an engineering programme, and one for every twenty students in a polytechnic programme. Part-time
faculty shall not be counted towards this ratio unless the Council has granted a written exception.

3.5 Land and building. The built-up area available for instruction shall be adequate for the sanctioned intake. Where
the land is held on lease, the lease shall run for not less than thirty years from the date of application.

3.6 Fire safety. A fire safety certificate valid on the date of application shall be furnished with every application. A certificate that has lapsed is treated as if none had been furnished.

This page is ordinary prose, not a table, so the rule changer cannot read it: it is the file to show how an
unstructured document is refused, and why reading such handbooks needs the AI step that is planned.
